

COFFEE-MATE® LIQUID CREAMER STATION

- ☛ America's #1 coffee creamer can build your business
- ☛ Allows for quick and easy access to keep coffee area moving
- ☛ Eliminates single-serve creamer theft
- ☛ Simplifies your operation by reducing labor

PASSIONATELY PREFERRED

BIG UPGRADES. BIG CONVENIENCE.

The new COFFEE-MATE® bulk dispenser is all about making life easier for you and your staff. Intuitive loading and temperature regulation, auto-defrosting and an easy-clean drip tray. It's a whole new bundle of user-friendly upgrades that will reduce the time you spend on maintenance and training—and keep your beverage service running more smoothly and efficiently.

- **Enhanced Valve Cartridge:** Tighter air seal around the bag-in-box tube keeps moisture from entering the refrigerated chamber, preventing frost buildup.
- **Easy Load-and-Lock Tube:** No more tricky threading; tube insertion is easy and intuitive—just insert the tube and lock it into place.
- **External Digital Thermometer and Temperature Control:** Digital thermometer now standard on the side panel of the unit; simple buttons make it easy to control the temperature setting.
- **Automatic Defrosting Cycle:** Self-defrosts every 4 hours to prevent frost buildup in high-humidity environments.
- **Suspended Drip Tray:** New 4" legs are NSF compliant; removable drip tray sits right below main body of dispenser (3.25" above counter surface) to minimize splashing and facilitate easy cleaning.

OUR NEWLY REDESIGNED BULK DISPENSER
MAKES IT EVEN EASIER
TO GIVE YOUR CUSTOMERS
THE COFFEE-MATE THEY LOVE.

THE LIQUID CREAMER STATION.

The high-volume creamer solution for your coffee program.

COFFEE-MATE® is more than a creamer. It's a powerful business builder, backed by the power of millions of devoted fans, who have made it America's #1 coffee creamer brand. In fact, studies show customers will *visit a location more often* if COFFEE-MATE is offered.* It improves satisfaction and increases coffee sales—and our liquid creamer station makes it easy and efficient for you and your customers. Our branded machine puts the power of COFFEE-MATE's brand to work for you.

"I started using COFFEE-MATE creamers in my restaurant and my customers are absolutely raving about it. I had no clue that a creamer could make such a difference. But this high quality product really does." — Eric S., DeFuniak Springs, FL

1. QUICK AND EASY-TO-USE LIQUID CREAMER STATION KEEPS TRAFFIC MOVING.

Whether self-serve or back-of-house, the quick-dispensing system saves time and eliminates hassle for customers.

"Customers enjoy not standing around and having to rip open the little containers for their creamer. This makes getting a simple cup of coffee a *get in, get out* operation." — George G., Bemus Pt., NY

2. HELPS YOUR BOTTOM LINE BY PREVENTING COSTLY CREAMER THEFT.

Now you can rest assured that every penny of your creamer investment is working hard to build your coffee sales.

"We have been using the bulk 1.5 gallon containers for about a year now and we have been very satisfied with the results. Before that we were using the small PC containers and they were "walking" in mass amounts. Since introducing the bulk machine, we are actually using less creamer than before." — Eric W., Atlanta, GA

3. REDUCES LABOR AND MESS.

Refrigerated dispensers reduce litter, keep creamer fresh and minimize restocking.

"We started using COFFEE-MATE dispensers about a year ago and our customers love them. They look good out on buffets and generate less waste and are more useful in our convention center." — Barry H., Covington, KY

4. AVAILABLE IN OUR THREE MOST POPULAR FLAVORS.

Two- and three-head dispensers allow you to offer a variety of popular flavors, including Original, French Vanilla and Hazelnut.

"We put in the COFFEE-MATE bulk creamers in three different flavors for our customer's coffee and it worked like a charm! Not only did we save money, but it gave us a variety and a quality product! Way to go COFFEE-MATE!"

— Thomas B., Rock Hill, SC
